Question 05

Read the following passage and answer the questions given.

If you are reading this right now, you are taking part in the wonder of literacy. Because of printed words, people can relay information across both time and space. Ideas are encoded in writing and transmitted to readers across thousands of miles and years. Because of this development, the words of people distant to us can influence events, impart knowledge, and change the world. Much of the credit for the development of this phenomenon can be attributed to one man.

Johannes Gensfleisch zur Laden zum Gutenberg, better known as **Johannes Gutenberg**, was born in the German city of Mainz. Though most of Gutenberg's early life is a mystery, historians believe that he studied at the University of Erfurt in 1418 and spent much of his young adult life practicing the profession of his father: goldsmithing. Having a **penchant** for fortune and success, Gutenberg borrowed money from investors in 1439 and found himself in financial trouble. In order to satisfy the investors, Gutenberg decided to share his greatest secret with them. This secret would forever change the world, all of history, and even the process of keeping history. It's been argued that Gutenberg's idea was one of the greatest of all mankind. This one idea would lead to the spread of countless **others**. This idea would bring learning to the masses and form the backbone of the modern knowledge-based economy. Gutenberg had created the mechanical printing press with movable type.

Before the spread of Gutenberg's idea, literature was primarily handwritten. That means that each copy of the Catholic bible and all of its 73 books were tediously and painstakingly hand **scribed**, and this was done before the invention of the ballpoint pen. Given the amount of detail that went into scribing each text, creating a single copy of a bible could take years. Because of the effort that went into producing them, books were extremely rare and valuable. Because of the value and scarcity of books, there was little reason for common people to learn to read or write since it was unlikely that they would ever handle a book in their lifetimes. Gutenberg's invention would change all of that. His printing press allowed **literature** to be produced on a mass scale. His movable metal type could be arranged once to form a page, and his press could print the page again and again.

The first major text that Gutenberg produced was a 42-line copy of the bible. Written in Latin and containing 1272 pages, the Gutenberg Bible has had an **immeasurable** effect on the history of the printed word. Scholars estimate that Gutenberg produced between 165 and 185 of these bibles, which sold out almost immediately. Most copies went to monasteries and universities, though one bible was sold to a wealthy private individual. Copies are known to have sold for 30 florins (about three years of wages for a clerk at the time), which may seem expensive but was nonetheless much cheaper than a hand produced copy. Purchasing a Gutenberg Bible in the 1450s would have been a good investment if you and your descendants were able to maintain it. Only twenty-one complete Gutenberg Bibles exist today and the last one traded hand in 1987 for 4.9 million dollars, the highest price ever paid for a book at the time.

Questions:

(I) Write answers to following questions. *(15 marks)*

1. According to text mention three benefits of printing on mankind.
2. Provide two reasons why it took a very long time to write books in the past.

3. State two disadvantages of the tiresome activity of creating books on the society.
4. Copy the section in the passage which explains that, printed books provided an economical option to people.
5. Explain why the writer says that, if you own one of the original copies of Gutenberg Bible in good condition there is a great business deal available to you.
6. Do you think Gutenberg is from a rich family or a common family? Support your answer with an evidence.
7. What is referred to as **others** in the 3rd paragraph?

(II) Match the following phrases with the above words in bold *(10 marks)*

1. Something special and unusual
2. Material with information
3. unlimited
4. to write
