Higher National Diploma in Information Technology

First Year, Second Semester Examination -2019

HNDIT1211- Data Structures and Algorithms

Question 01

a. Define Data Structure? Argument of Data Computer Storage (02 Marks)

b. briefly describes primitive and abstract data types? give one example for each.(04 marks)

c. Briefly explain the following terms.

i. Best Case Efficiency.

ii. Worst Case Efficiency

iii. Average Case Efficiency (6 marks)

d. Write C++ code to create the following array and display it on the screen. (Hint: consider the pattern of the data set when creating it)

2	4	6	8	10	12	14

e. Write a C++ program that stores the given marks of the student and display the average mark of each student. Use 2D array to store the subject marks.
