During the storm, the _____ of the tree fell onto the sidewalk. x. The teacher asked _____ to present his project to class.

Question No. 03 [Total 25 Marks]

Read the following passage and answer the questions given below. (15 marks)

Passage on Metal Detectors: Have you ever been to the beach? Did you see a man with a headset pointing a long pole at the ground? If so you might have seen a person using a **metal detector**. People use these devices to find metal.

Metal detectors make magnetic waves. These waves go through the ground. The waves change when they hit metal. Then the device beeps. This lets the person with the device know that metal is close.

The first metal detectors were meant to help miners. They were big. They cost a lot of money. They used a lot of power. And worst of all, they didn't work well. People kept trying to make them better. Metal detectors got smaller. Now they are light and cheap. They also work better. That is why people bring them to the beach. They can look for rings in the water. They can look for phones in the sand. Metal detectors help them find these things. They usually just find junk though. Metal detectors also protect people. They help to keep guns out of some places. They are in airports. They are in courthouses. Some schools use them. They help guards look for weapons. Guards use special wands to find metal on a person. These devices save lives in other ways too. During wars, people plant bombs in the ground. When the war ends, they don't clean up their messes. This is a big problem. The bombs are hard to find. People step on them. They get hurt. The devices help people find these old bombs.

Questions:

i. What is the name of the device mentioned in the passage? ii. How do metal detectors work? iii. How did the first metal detectors help the society? iv. Mention the changes that have taken place in metal detectors over the years. v. What is the difference between a metal detector used at the beach and the one used by a security guard? vi. State three places where metal detectors are used for security purposes. vii. What are the two types of things that people usually find at the beach when using metal detectors? viii. Explain how metal detectors save lives in another way.

II) Fill in the blanks with the suitable form of the verb given in the brackets. (1x10=10 marks)
