The Coliseum is an ancient stadium in the center of Rome. It is the largest of its kind. It is very old. They started building it in the year 70. It took ten years to build. The Coliseum is quite different to the earlier Greek theatres. It is really two Roman theatres joined together. It is oval shaped, 189 metres long, and 156 metres wide. It covers an area of 6 acres. The outer wall is 48 meters high. The arena is an oval, 87m long and 55m wide, surrounded by a wall 5m high. Around the arena were raised rows of seats.

The Coliseum has been damaged many times over the years. It was struck by lightning in the year 217. This started a fire. Much of the Coliseum is made of stone. But the fire damaged the upper levels. They were made of wood. This damage took many years to repair. It was not finished until the year 240. The worst damage happened in 1349. A mighty earthquake shook Rome and the Coliseum. The south side of the building **collapsed**. Pieces of the **arena** were all over the ground. Many people took the fallen stones. Others took stones from the seating areas. They used them to repair houses and churches. The Romans of those days were not connected to the Coliseum. It had last been used as a castle. Before that it was a **graveyard**. It has been hundreds of years since the games. The damage to the Coliseum was never repaired. It's a good thing the outer wall of it still stands strong.

Today the Coliseum is one of Rome's most popular attractions. People from all over the world come to Italy to see it. The Pope leads a big march around it every Good Friday.
