Question 03

i. Fill in the blanks using the expressions in the parenthesis.

(of course, what's up, absolutely, would you mind, anytime, not at all, great, no problem, that's all, anything else you need)

Alex and Jamie are working in an office on a joint project with a tight deadline. Alex needs some help from Jamie.

Alex: Hi, Jamie. Do you have a moment?

Jamie: Sure, Alex! a) what up ?

Alex: Well, I'm working on the final report for the project, and I was wondering if you could help me with some of the data analysis. b) would you mind ?

Jamie: c) of course . What exactly do you need help with?

Alex: I'm struggling with the sales figures from the last quarter. Could you double-check the calculations? I just want to make sure everything is accurate.

Jamie: d) absolutely ! I'll go over the numbers. Do you have them on your computer?

Alex: Yes, I'll email you the file right now. If it's not too much trouble, could you finish it by tomorrow morning?

Jamie: I'll try my best. I have a meeting this afternoon, but I can start after that. Is that okay?

Alex: e) no problem , that's fine. Thank you so much, Jamie. I really appreciate it.

Jamie: f) great , happy to help. By the way, would you be able to send me the charts you used as well? It might make it easier for me to review the numbers.

Alex: Oh, sure! I'll send those along with the main file. g) anything else ?

Jamie: No, I think h) that's all . I'll get back to you if I have any questions.

Alex: i) not at all ! Thanks again, Jamie.

Jamie: j) any time, Alex. Let me know if you need any more help.

(10 Marks)

Question 06

Read the following passage and answer the questions.

Cryptocurrency is a modern way to buy and sell things using digital money. It's different from regular money because it's not controlled by a government or bank. This makes it fast, secure, and reliable for people to use from anywhere in the world. Instead of using paper money, cryptocurrency is like virtual money that you can use to buy things online. It's kept safe by an advanced technology called blockchain, which makes sure that transactions are honest and can't be changed. Cryptocurrency is also special because you don't need a bank or other middleman to use it and it's becoming popular for people who want to invest their money differently.

A blockchain is like a digital book that stores records of transactions that can't be changed. This book is shared with lots of people, not just one person, so it's secure. Everything that's added to the book is kept forever, and it shows a history of all transactions that have happened. This is great for businesses that need to be open and honest about what they're doing because it means everyone can see what's going on. It also means people can trade things without needing a bank to help them. This could be quicker and cheaper. In short, a blockchain is a clever way of sharing information that could change the way we use technology to do things.

Choosing the best digital currency can be tough because there are many options. The most well-known one is Bitcoin and is used the most. Ethereum lets developers make new things besides just money. Ripple is good because it's fast and used by banks. Litecoin and Bitcoin Cash have some advantages over Bitcoin. Think about what you want from your investment and research the benefits of each to decide which digital currency is right for you.

Digital currency is like the James Bond of money…it's sleek, high-tech, and here to save the day. It's the go- to for the next generation because everything's just a click away. Trade stocks or buy that must-have pair of sneakers with ease, and without the need for a bank. Digital currency keeps your identity under wraps, making it easier for you to purchase that top-secret birthday gift for your bestie. Inflation? No chance. With digital currency, we can help save the planet from becoming one big Monopoly board. It's super convenient with an increasing number of shops accepting it, so you'll be paying for your Big Mac in no time.

Cryptocurrency is changing the world in a big way. It's providing a new way to handle money that's fast, affordable, and belongs to everyone. You don't need a bank or the government to look after your money because you can manage it yourself. Cryptocurrency is transparent and secure, so it's hard to cheat. Governments and business owners are investing in it because it's an exciting new way of doing things. Cryptocurrency shows us that we can solve problems in new ways, not just by using traditional methods. Hold onto your hats, folks, because digital currency is always surprising us with new ideas. Stay tuned!

i. State whether the following statements are True (T) or False (F)
   a) Cryptocurrency is controlled by banks and governments. ( )
   b) Blockchain technology ensures that cryptocurrency transactions are secure and unchangeable. ( )
   c) Ripple is known for its slow transaction speed. ( )
