Higher National Diploma in Quantity Surveying
2nd Year, 1st Semester Examination- 2022
QS 21023 – Building Economics - I

Instructions for Candidates:	No. of questions : 06
Answer 05 questions only	No. of pages : 04
All questions carry equal marks	Time : 03 hours

Question 01

Preliminary estimation techniques are essential in the construction industry for determining a project's scope, cost, time, and resource requirements prior to detailed planning and execution.

1. List out the major types of preliminary estimation techniques? (04 marks)
2. Elaborate the advantages and disadvantages of the superficial area method? (04 marks)
3. What kind of variables are considered at the calculation of the cubic rate method? (04 marks)
4. Explain the definitions of direct and indirect construction stakeholders and enumerate their responsibilities. (04 marks)
5. The hotel complex with luxurious facilities is located in Kalutara. The plan of gross floor area of the hotel building given below. (04 marks)

   Wall Thickness = 200mm

   Here are the costs for a comparable hotel built in the same location:
   Total Cost – Rs. 100 Million
   Gross floor area – 2000 m^2
   You need to figure out how much the new building project will approximately cost.

(Total 20 Marks)

Question 02

Quantity surveyors estimate and manage the costs of materials and labor on large building projects. Quantity surveyors (also known as 'cost consultants', 'commercial managers', 'cost managers' and 'cost engineers' manage costs on construction projects.)

1) Briefly explain the key responsibilities of a Quantity Surveyor. (04 marks)
2) What are two main roles of a Quantity Surveyor? Give explanations to each role. (04 marks)
3) List out the types of construction contracts according to the method of payment. (04 marks)
4) What are the major types of risks associated in a Construction contract? (03 marks)
5) Explain the types of risks faced by a Quantity Surveyor when handling a construction project. (05 marks)

(Total 20 Marks)

Question 03

The RIBA Plan of Work serves as a framework for architects to utilize on projects. It has developed into an industry-wide instrument over time. It describes the main responsibilities, information exchanges, and anticipated results for a construction project.

1. Give a brief description of the RIBA plan of work and list its primary benefits. (04 marks)
2. Name four feasibilities which have been considered in the Strategic Definition stage. Briefly Explain two of them? (04 marks)
3. Describe the key factors taken into account when determining the project budget. (04 marks)
4. Outline the stages of the RIBA work plan and describe the functions of quantity surveyors at each stage. (04 marks)
5. Identify the causes of construction project cost overruns. (04 marks)

(Total 20 Marks)

Question 04

1) Briefly explain the following economic systems.

a. Traditional Economy
b. Capitalist Economy
c. Mixed Economy (2 X 3 = 6 Marks)

2) What do you mean by "Consumer's surplus"? (02 marks)

3) Explain the law of Demand? (02 marks)

4) What are the three types of elasticity of demand? (02 marks)

5) What is the elasticity of supply? Mention the factors determining elasticity of supply? (05 marks)

6) What is the meaning of the term "equilibrium" in a market structure? (03 marks)

(Total 20 Marks)

Question 05

1) Explain briefly how the construction industry contributes to the National Economy? (04 marks)

2) What is meant by GDP? What are three approaches in calculating GDP in a Country? (04 marks)

3) What are the factors effected for delaying the construction project? (04 Marks)

4)) What are the main criteria considered by CIDA for Registration of Contractors? (04 Marks)

5) Name the four State authorities and their roles in the Construction Industry? (04 marks)

(Total 20 Marks)

Question 06

1) Briefly explain the impact of Construction industry on the environmental pollution. (05 Marks)

2) Re Use, Recycle, reduce (3R) concept helps to minimize environmental pollution. Explain this statement? (06 marks)

3) What are the basic steps of Quality Controlling (QC) of a Construction Project? (04 marks)

4) Explain briefly Occupational Health and Safety Precaution is applied in Construction Project? (05 marks)

(Total 20 Marks)
